

HUTTON

CONSTRUCTION

Belle Plaine School Area Residents

As you all know, we've been making great improvements and additions to your area school system. We are currently wrapping up Phase I of the High School addition and will transition to Phase II around Spring Break (March 20-24, 2017), part of that transition includes turning our attention to Merchant Street. In order to access the new construction we have requested turning Merchant Street into a one way street (traffic will flow to the North), the city has granted this request and we want to update you the homeowners. Hutton Construction will install construction fencing directly in front of the new construction and place caution cones down the middle of the street. Directional signage will be placed to avoid confusion. Attached is a site plan showing where the fencing will be placed and where the caution cones will start and stop. We applaud the area residents for the understanding you've provided during this construction phase and hope everyone will continue that same patience with us while we are completing the major addition to the Belle Plaine School district.
